Not illustrated. 1922 Excerpt: .be explained in some detail, because they are of great importance in educational measurement, and because unfortunately several difficulties are in the way of the educational research worker, who desires to obtain such individual measures of pupils. In the investigation we are here reporting we found three difficulties in determining individual ages in arithmetic by the Woody-McCall Scale for Mixed Fundamentals. Two difficulties were met in obtaining results from the National Intelligence Tests, namely, the second and third described below. All of these difficulties have apparently been appreciated by the authors of the Thorndike-McCall Reading Scale, therefore they were not encountered by us in obtaining reading ages. This Thorndike-McCall Reading Scale is so arranged that the reading age can be read off for each pupil after his score is known almost as quickly as one can copy down the numbers. Probably, in the future all new tests which are devised will be arranged so that these easy calculations can be made. However, since many tests already are on the market which are very useful in many ways, but in which this easy method of determining the achievement age is not used, it seems worth while to explain what the three difficulties were which we encountered in the use of the Woody-McCall Scale, and to explain how we overcame them. In the first place the authors of this test gave norms for it in terms of grade, and not in terms of age. We wanted age norms....
