

# Space Shuttle Program (SSP) Shock Test and Specification Experience for Reusable Flight Hardware Equipment

Filesize: 9.6 MB

## ***Reviews***

*A must buy book if you need to adding benefit. Better then never, though i am quite late in start reading this one. I am very happy to inform you that this is basically the very best book we have study during my own life and could be he finest ebook for possibly.*

*(Rodger Hane)*

## SPACE SHUTTLE PROGRAM (SSP) SHOCK TEST AND SPECIFICATION EXPERIENCE FOR REUSABLE FLIGHT HARDWARE EQUIPMENT

Bibliogov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. As commercial companies are nearing a preliminary design review level of design maturity, several companies are identifying the process for qualifying their multi-use electrical and mechanical components for various shock environments, including pyrotechnic, mortar firing, and water impact. The experience in quantifying the environments consists primarily of recommendations from Military Standard-1540, Product Verification Requirement for Launch, Upper Stage, and Space Vehicles. Therefore, the NASA Engineering and Safety Center (NESC) formed a team of NASA shock experts to share the NASA experience with qualifying hardware for the Space Shuttle Program (SSP) and other applicable programs and projects. Several team teleconferences were held to discuss past experience and to share ideas of possible methods for qualifying components for multiple missions. This document contains the information compiled from the discussions. This item ships from La Vergne, TN. Paperback.
