0.8in. Resolving a decades long divide between what are often held to be incommensurate paradigms, Social Bonding and Nurture Kinship unites cultural and biological approaches to social life and kinship. The synthesis is non-reductive, respecting the core tenets of both paradigms, and also incorporates psychological attachment theory into the account. Praised by adherents of both perspectives, the work provides an exhaustive survey of the theoretical debates and empirical findings across a wide array of disciplines, providing students of social behaviour and kinship with a rich and comprehensive resource. This work is a powerful example of how social and physical sciences can unite on equal terms, without the danger of one being subsumed by the other. Both approaches emerge stronger as a result. Early Reviews: Maximilian Holland gets to the heart of the matter concerning the contentious relationship between kinship categories, genetic relatedness and the prediction of behavior. If he had been in the debate in the 1980s then a lot of subsequent confusion could have been avoided. - Robin Fox, Emeritus Professor of Anthropology, Rutgers. NAS Member A landmark...
