Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: .too, remains the same According to the above we must now imagine a finite space filled with such representing points, an infinitely small pencil of vectors of velocity starting from each point, mutually equal, and also equal for all the points. Js ow a number of these representing points strikes against one of the above mentioned surfaces, e.g. with equation $(, - -) + (/ , - . / ,) + (, - ,) = 4r$; this implies then that for these systems the first and the second molecule collide. This surface is that of a cylindre of revolution of the $3n--3t$, degree, against the outside of which the points strike.1) The base of the cylindre is a sphere, the descriptive lines have here become descriptive spaces, namely plane spaces ot $3/t--3$ dimensions. In the collision referred to, the extension from which the points come being large...
